

Are you a basketball coach who's tired of manually tracking player statistics via paper and pencil and need a more efficient and effective method to track LIVE stats? Start Tapping!

TAP STATS

Category: Sports
 Version 1.8.6, iPad
 Updated December 20, 2016
 Tap Stats is for basketball Coaches of all levels.

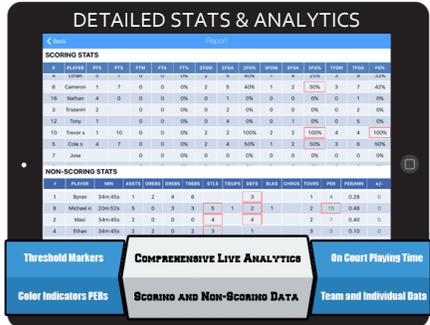

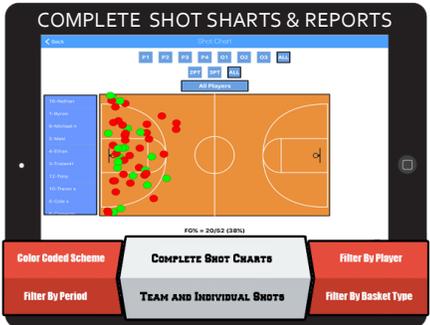

Have you tried all of the basketball statistics apps but can't find the one that's SIMPLE to use and actually helps you with your on-court coaching decisions? Imagine having the ability to track LIVE stats and know Player Efficiency Ratings (PERs) for all your players in real time. Introducing... Tap Stats RAW - Reinforcement and Award System for Basketball.

The app has been designed BY basketball coaches FOR basketball coaches. The development team has spent countless hours working with coaches at all levels to produce a very simple yet effective Player Efficiency Rating (PER) computational and statistics app.

"I value all the detailed statistics the app offers, but the two that helps me with the parents are the minutes played and efficiency ratings per minute. For club and travel basketball, the biggest complaint I receive from parents is the minutes played for their athlete. I use the PER/minute to validate and support all my substitution decisions. I can't have a player on the court for 90% of the time if he keeps turning the ball over (negative PER) or doesn't contribute to the team performance. This is one more of the more useful basketball statistics apps I have seen. It's not complicated and it's very easy to use."

- Coach Tony (SCHBA), LA, CA

Tap Stats includes a free 30 day trial and 1 year annual subscription option for \$19.99.
